

Software Requirements Specification (SRS)

Conveyor Group Restaurant: Corporate Cashless Cafeteria & QR Meal Management System (CCCMS)

Prepared For: Conveyor Group Restaurant

Project Foundation & Business Requirements

1.1 Project Name

Conveyor Group Restaurant – Corporate Cashless Cafeteria & QR Meal Management System (CCCMS)

1.2 Project Overview

The **Corporate Cashless Cafeteria & QR Meal Management System (CCCMS)** is an enterprise-level web application designed for the **Conveyor Group Restaurant**. The system enables employees (Clients), Guests, Restaurant Managers, Kitchen Heads, and Super Administrators to manage daily cafeteria operations through a centralized digital platform.

Each permanent client is assigned a unique profile along with a secure QR code-based identity card. Restaurant Managers can instantly scan the QR code to verify the client and place food orders. The Kitchen Head receives orders in real time, prepares the meals, and updates the order status throughout the workflow using a real-time tracking system.

The platform also provides modern enterprise features such as **cashless payments, digital wallets, salary deduction, monthly billing, digital invoices, guest management, real-time order tracking, and restaurant analytics**, ensuring an efficient, transparent, and automated cafeteria management process.

1.3 Project Objectives

The primary objectives of the proposed system are:

- QR Code-based client identification
- Cashless food ordering
- Corporate meal management
- Guest management
- Kitchen automation
- Digital invoice generation
- Monthly statement generation
- Salary deduction support
- Digital wallet management
- Real-time order tracking
- Analytics dashboard
- Secure Role-Based Access Control (RBAC)

2. Scope of the Project

This software is **not** a conventional Point-of-Sale (POS) system.

It is an **Enterprise Corporate Restaurant Management Platform** specifically designed to manage corporate cafeteria operations. The system integrates client management, QR-based authentication, cashless payment processing, meal ordering, kitchen workflow automation, guest management, billing, reporting, and administrative control into a single centralized platform.

The project aims to improve operational efficiency, reduce manual intervention, enhance transparency, and provide a scalable solution suitable for large corporate organizations.

Project Scope

User Management

- Client Registration
- Manager Management
- Kitchen Staff Management
- Role Management
- Guest Management

Restaurant Management

- Menu Management
- Category Management
- Table Management
- Order Management
- Kitchen Queue
- Meal Preparation
- Food Serving

Billing Management

- Wallet System
- Salary Deduction
- Monthly Billing
- Guest Billing
- Corporate Billing
- Complimentary Meal

QR Management

- QR Generation
- QR Download
- QR Print
- QR Replacement
- Lost Card Management
- QR Activation
- QR Deactivation

Reporting

- Daily Report
- Weekly Report

- Monthly Report
- Department Report
- Client Report
- Guest Report
- Revenue Report
- Food Consumption Report

Dashboard

- Super Admin Dashboard
- Manager Dashboard
- Kitchen Dashboard
- Client Dashboard

3. Stakeholders

Stakeholder	Responsibility
Super Admin	Manage the entire system
Manager	Receive orders and manage restaurant operations
Kitchen Head	Prepare orders and manage kitchen operations
Waiter	Serve food to customers
Client	Receive meals using a QR code
Guest	Temporary or walk-in customer
Finance Department	Manage billing and salary adjustments
HR Department	Employee management (Future Integration)

4. User Roles

The system will have a total of six primary user roles.

4.1 Super Admin

The highest-level user with full system privileges.

4.2 Manager

Responsible for managing restaurant operations.

4.3 Kitchen Head

Responsible for managing kitchen orders and operations.

4.4 Waiter

Responsible for collecting prepared meals from the kitchen and serving them to the designated tables.

4.5 Client

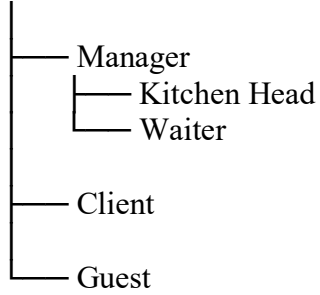

A corporate employee or authorized customer.

4.6 Guest

A temporary or walk-in customer.

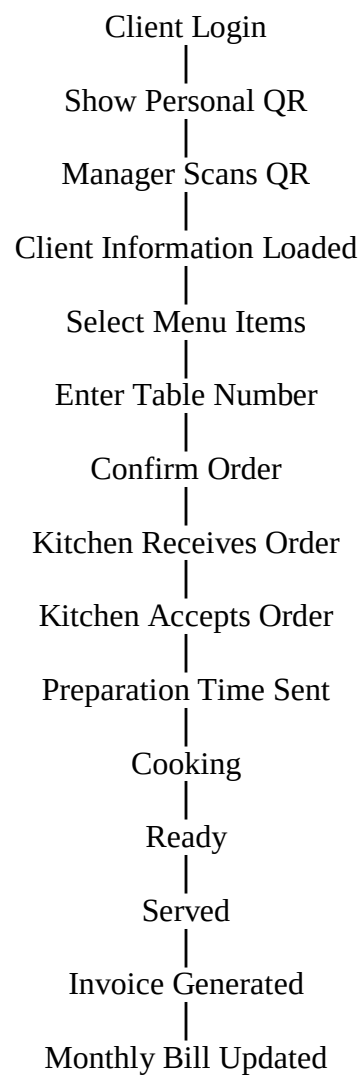

5. Role Hierarchy

Super Admin

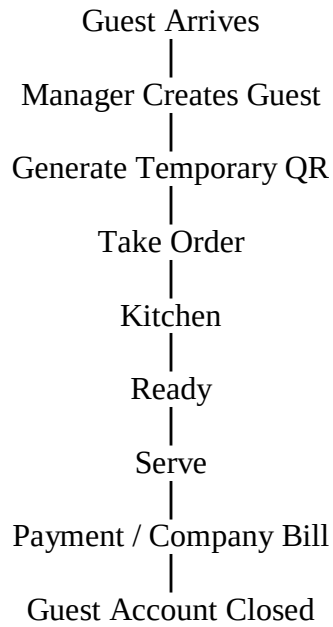

6. Core Business Workflow

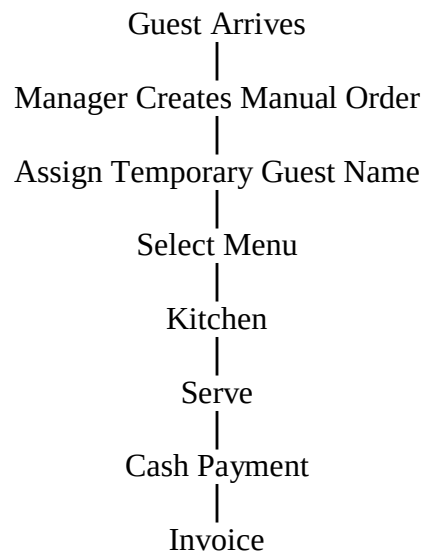

6.1 Permanent Client Order Workflow

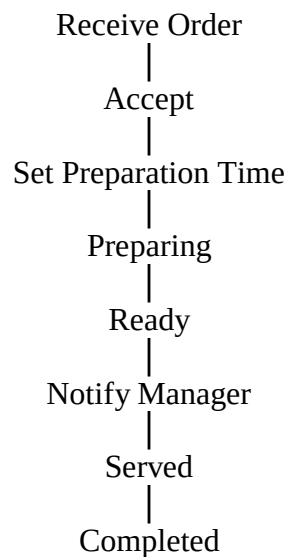

6.2 Guest Order Workflow

6.3 Walk-in Guest Workflow

6.4 Kitchen Workflow

Functional Requirements, Roles, Permissions & Business Rules

7. Super Admin Module

7.1 Purpose

The **Super Admin** is the highest-privileged user in the system. They are responsible for managing the entire system, including users, restaurant operations, billing, reports, and system settings.

7.2 Super Admin Dashboard

Dashboard Cards

- Total Clients
- Active Clients
- Total Guests
- Today's Orders
- Running Orders
- Ready Orders
- Completed Orders
- Today's Revenue
- Monthly Revenue
- Total Managers
- Total Kitchen Staff
- Active Tables

Dashboard Charts

- Daily Sales Chart
- Monthly Revenue Chart
- Most Ordered Food
- Department Wise Consumption
- Peak Ordering Hours
- Top Spending Clients
- Guest vs Client Orders

7.3 Permissions

User Management

- ✓ Create Client
- ✓ Edit Client
- ✓ Suspend Client
- ✓ Delete Client
- ✓ Reset Password
- ✓ View Client History

Manager Management

- ✓ Create Manager
- ✓ Edit Manager
- ✓ Delete Manager
- ✓ Enable/Disable Manager

Kitchen Management

- ✓ Create Kitchen Head
- ✓ Assign Kitchen Staff
- ✓ View Kitchen Performance

Menu Management

- ✓ Add Menu
- ✓ Edit Menu
- ✓ Delete Menu
- ✓ Activate Menu
- ✓ Deactivate Menu

Restaurant Settings

- ✓ Manage Tables
- ✓ Restaurant Settings
- ✓ Email Settings
- ✓ Invoice Settings
- ✓ Notification Settings

Reports

- ✓ View All Reports
- ✓ Export Excel
- ✓ Export PDF
- ✓ Print Reports

8. Manager Module

8.1 Purpose

The **Manager** is responsible for overseeing the daily operations of the restaurant.

The Manager's primary responsibilities include:

- QR Scan
- Order Creation
- Guest Management
- Table Management
- Kitchen Coordination

8.2 Manager Dashboard

Dashboard Cards

- Today's Orders
- Pending Orders
- Preparing Orders
- Ready Orders
- Completed Orders
- Active Tables
- Today's Guests
- Today's Revenue

Quick Actions

- Scan QR
- New Order
- New Guest
- View Kitchen Queue
- Print Invoice

8.3 QR Scanner Module

The Manager can scan QR codes using a mobile camera or webcam.

After a Successful Scan

The system will display:

- Client Name
- Employee ID
- Department
- Designation
- Profile Photo
- Wallet Balance
- Current Monthly Bill
- Last Order Date
- Account Status

QR Validation

The system will verify:

- Whether the QR code is active
- Whether the QR code has expired
- Whether the client account is suspended
- Whether the card has been reported as lost

Invalid QR Messages

- Invalid QR Code

OR

- Expired QR Code

OR

- Account Suspended

8.4 Order Management

The Manager can create new orders.

Order Creation Form

Client Information

- Client Name
- Employee ID
- Department

Order Information

- Table Number
- Order Type
- Special Instructions
- Priority

Order Types

- Dine In
- Take Away
- Guest Order
- Corporate Guest

Priority Levels

- Normal
- High
- VIP
- Urgent

Menu Selection

- Food Name
- Quantity
- Unit Price
- Total Price

Automatic Calculation

The system will automatically calculate:

- Subtotal
- Discount
- Tax
- Grand Total

8.5 Guest Management

The Manager can create guest accounts.

Guest Types

Type	Guest Category	Description
Type 1	Temporary Guest	A guest account with a limited validity period and a temporary QR code.
Type 2	Walk-in Guest	A customer who visits without prior registration or a QR code.
Type 3	Corporate Guest	A guest representing a company, with billing charged to the company, department, or cost center.

Temporary Guest Form

Required Fields

- Guest Name
- Mobile Number
- Organization
- Purpose
- Validity Period

Validity Options

- 1 Hour
- 3 Hours
- 6 Hours
- 12 Hours
- 24 Hours
- Custom Expiry

System Actions

The system will generate:

- Guest ID

- Temporary QR Code
- Expiration Time

Walk-in Guest Form

Required Fields

- Guest Name
- Table Number

No QR code is required.

Corporate Guest Form

Required Fields

- Guest Name
- Company Name
- Department
- Purpose

Bill To

- Company
- Department
- Cost Center

9. Kitchen Head Module

9.1 Purpose

The Kitchen Head is responsible for managing kitchen order processing.

9.2 Kitchen Dashboard

Dashboard Cards

- Pending Orders
- Preparing Orders
- Delayed Orders
- Ready Orders
- Completed Orders

Kitchen Queue

All orders will be displayed on a First-In, First-Out (FIFO) basis.

If a Manager assigns a priority, the order will be moved higher in the queue based on its priority level.

9.3 Order View

The Kitchen Head can view:

- Order Number
- Client Name

- Table Number
- Food Items
- Quantity
- Special Instructions
- Order Time
- Priority

9.4 Kitchen Actions

Accept Order

- Order Received

Set Preparation Time

Examples:

- 10 Minutes
- 15 Minutes
- 20 Minutes
- 30 Minutes
- Custom Time

Status Updates

- Accepted
- Preparing
- Delayed
- Ready
- Completed

9.5 Delay Management

If an order is delayed, the Kitchen Head must select a reason.

Delay Reasons

- Ingredient Shortage
- High Kitchen Workload
- Equipment Issue

10. Waiter Module

Purpose

The Waiter is responsible for delivering prepared meals to the designated table.

Waiter Dashboard

- Ready Orders
- Assigned Orders
- Delivered Orders

Actions

Receive Order

Receive the order from the kitchen.

Deliver Order

Deliver the order to the designated table number.

Mark as Delivered

The order status will be updated accordingly.

11. Client Module

Purpose

Corporate Employee Dashboard

Client Dashboard

Dashboard Cards

- Current Month Bill
- Today's Orders
- Wallet Balance
- Total Orders
- QR Status

Quick Actions

- View QR
- Download QR
- Print QR
- View Orders
- Download Invoice

11.1 Client Profile

Personal Information

- Name
- Employee ID
- Department
- Designation
- Phone
- Email
- Profile Photo

11.2 QR Card

The Client can view:

- QR Code
- QR Number
- QR Status

- Issue Date

Actions

- Download QR
- Print QR

11.3 Order History

The Client can view:

- Order Date
- Order Number
- Items
- Quantity
- Amount
- Status

11.4 Monthly Statement

The Client can view the following information for the current month:

- Total Orders
- Total Amount
- Total Due
- Paid Amount
- Outstanding Balance

Download Options

- PDF
- Excel

11.5 Invoice Module

The Client can view each invoice.

Invoice Information

- Invoice Number
- Date
- Items
- Quantity
- Price
- Total

12. Guest Module

Temporary Guest Dashboard

After logging in, a Guest can view:

- Guest ID
- Expiration Time
- Active Orders

- Invoice History

Restrictions

Guests are **not** allowed to:

- Use the Wallet
- Access Monthly Billing
- Use Salary Deduction
- Modify Orders

Database Design, Business Rules, Reports, Security & Technical Specification

13. Database Design

13.1 Database Overview

The system will use a **Relational Database (MySQL/PostgreSQL)**.

All data will follow **Foreign Key relationships**, and **Referential Integrity** will be maintained throughout the database.

13.2 Core Database Tables

Authentication

- Users
- Roles
- Permissions
- User Sessions
- Password Reset Tokens

Organization

- Departments
- Companies
- Branches

Restaurant

- Tables
- Table Status
- Menu Categories
- Menu Items
- Menu Availability

Customer

- Clients
- Guest Accounts
- Guest QR Tokens
- Client QR Tokens

Orders

- Orders
- Order Items
- Kitchen Queue
- Kitchen Status History

Finance

- Wallet
- Wallet Transactions
- Salary Deduction
- Monthly Statements
- Invoices
- Invoice Items

Notification

- System Notifications
- Email Logs

Security

- Audit Logs
- Login History
- QR Scan History

14. Payment Modes

The system will support the following payment modes.

Wallet

The payment amount will be deducted from the client's wallet.

Salary Deduction

The order amount will be added to the employee's salary statement at the end of the month.

Cash

Applicable for guests and walk-in customers.

Company Billing

The bill for a corporate guest will be charged to the company's account.

Complimentary

A free meal will be provided, and a zero-amount invoice will be generated.

15. Wallet Module

The Wallet Module is applicable only to permanent clients.

Wallet Features

- Wallet Balance
- Recharge
- Transaction History
- Debit
- Credit
- Adjustment

Wallet Transactions

Every wallet transaction will be recorded.

Example:

Type	Amount
Recharge	+1000
Lunch	-180
Coffee	-60

16. Salary Deduction Module

This module is designed for clients who receive meals through salary deduction.

Monthly Calculation

The system will automatically calculate:

- Total Orders
- Total Amount
- Previous Due
- Current Due
- Final Amount

Statement Example

- Employee Name
- Department
- Current Month Total
- Previous Due
- Grand Total

17. Invoice Module

An invoice will be generated for every order.

Invoice Information

- Invoice Number
- Invoice Date
- Client Name
- Guest Name (if applicable)
- Order Items
- Quantity
- Unit Price

- Total Price
- Discount
- Tax
- Grand Total
- Payment Method

Invoice Types

- Client Invoice
- Guest Invoice
- Corporate Guest Invoice
- Complimentary Invoice

Export Options

- Print
- PDF
- Email

18. Notification Module

The system will automatically send notifications.

Client Notifications

- Order Accepted
- Cooking Started
- Food Ready
- Invoice Generated
- Monthly Statement

Manager Notifications

- Kitchen Accepted
- Food Ready
- Order Delayed

Kitchen Notifications

- New Order
- Order Cancelled

19. Reports & Analytics

Daily Reports

- Daily Orders
- Daily Sales
- Daily Guests
- Daily Revenue

Weekly Reports

- Weekly Revenue
- Food Consumption

Monthly Reports

- Monthly Revenue
- Monthly Client Billing
- Monthly Guest Billing

Client Reports

- Meal History
- Monthly Statement
- Wallet Statement

Kitchen Reports

- Average Cooking Time
- Delayed Orders
- Completed Orders

Financial Reports

- Revenue
- Salary Deduction
- Wallet Transactions
- Complimentary Meals

Export Formats

- Excel
- PDF
- CSV

New Core Business Requirements (Final)

1. Employee Type Configuration (NEW)

Account Create করার সময় Manager/Super Admin-কে প্রথমেই নির্বাচন করতে হবে।

Employment Type

- Company Employee
- External Client
- Contractor
- Temporary Employee

Meal Eligibility

তারপর নির্বাচন করতে হবে—

Meal Plan

- Fixed Company Meal
 - Custom Menu
 - Complimentary Meal
-

Fixed Company Meal

যদি Company Employee হয়,

তাহলে সে Menu থেকে নিজের ইচ্ছামতো খাবার নির্বাচন করতে পারবে না।

System Automatically সপ্তাহের নির্ধারিত Meal দেখাবে।

উদাহরণ

Day	Meal
Saturday	Khichuri
Sunday	Egg
Monday	Fish
Tuesday	Chicken
Wednesday	Beef
Thursday	Vegetable
Friday	Special Menu

Manager চাইলে সপ্তাহের Meal পরিবর্তন করতে পারবেন।

Daily Meal Restriction

প্রতিটি Employee

দিনে

Maximum Meal = 1

একবার Meal গ্রহণ করার পরে

Already Collected Today

দেখাবে।

2. Meal Collection Type (NEW)

Order করার সময় বাধ্যতামূলকভাবে নির্বাচন করতে হবে

Meal Type

○ Dine In

○ Take Away

যদি Dine In

↓

Table Number লাগবে।

যদি Take Away

↓

Table Number লাগবে না।

3. Meal Pre-Booking (NEW)

Client আগামী দিনের Meal আগে থেকেই বুক করতে পারবে।

Example

Today

↓

Book Tomorrow Lunch

↓

Confirmed

Pre-book করলে Kitchen Estimate-এ যোগ হবে।

Manager Dashboard-এ

Tomorrow Orders

আলাদা দেখা যাবে।

4. Guest Request Module (NEW)

এটি আমার মতে পুরো সিস্টেমের অন্যতম গুরুত্বপূর্ণ Feature হওয়া উচিত।

প্রত্যেক Client Dashboard-এ থাকবে

Guest Request

Client লিখবে

Guest Count

3

তারপর

Guest Information

- Name
- Phone (Optional)
- Organization

Meal

- Lunch

Payment

Wallet / Salary

Submit

Manager Approval

↓

Approved

↓

Guest QR

↓

Guest Meal

Guest-এর সমস্ত খরচ Client-এর Account-এ যোগ হবে।

5. Wallet / Salary Selection (UPDATED)

বর্তমানে PDF-এ Wallet এবং Salary Deduction আছে। :contentReference[oaicite:2]{index=2}

আমি এটিকে আরও উন্নত করব।

প্রতিটি Client-এর থাকবে

Default Payment Method

- Wallet
- Salary
- Company

কিন্তু Order করার সময় Client চাইলে পরিবর্তন করতে পারবে।

যেমন

আজকের Order

Pay From

- Wallet
- Salary

6. Wallet Recharge (UPDATED)

বর্তমানে Recharge শুধু Transaction হিসেবে আছে। :contentReference[oaicite:3]{index=3}

নতুন Workflow হবে

Client

↓

Give Cash

↓

Manager

↓

Recharge Wallet

↓

Coin Added

↓

History Saved

Wallet-এর নাম

Meal Coin

করার প্রস্তাব দিচ্ছি।

কারণ Coin System ব্যবহার করলে User-এর কাছে এটি আরও সহজবোধ্য হবে।

7. Complimentary Employee (NEW)

Account তৈরির সময়

নতুন Field

Meal Benefit

○ Company Subsidized

○ Complimentary

○ Self Paid

যদি

Complimentary

হয়

তাহলে

Fixed Meal

Zero Cost

Invoice

Amount = 0

Company Subsidy++

8. Tomorrow Kitchen Planning (NEW)

Manager Dashboard-এ

নতুন Menu

Tomorrow Planning

এখানে দেখা যাবে

আগামীকাল

Fish

Chicken

70

Egg

35

Rice

190

Estimated Total Meals

225

Kitchen এই Report ব্যবহার করে বাজার করবে।

9. Purchase & Expense Module (NEW)

এটি বর্তমানে PDF-এ নেই এবং আমি এটিকে **Core Module** হিসেবে যোগ করার সুপারিশ করছি।

36. Meal Calendar & Weekly Menu Planner (NEW)

36.1 Overview

Meal Calendar Module-এর মাধ্যমে Super Admin বা Manager পুরো সপ্তাহ বা মাসের খাবারের তালিকা আগেই নির্ধারণ করতে পারবেন। এর ফলে Fixed Meal Employee, Kitchen Planning, Pre-booking এবং Purchase Planning স্বয়ংক্রিয়ভাবে পরিচালিত হবে।

36.2 Weekly Meal Planner

Day	Breakfast (Optional)	Lunch	Dinner (Future)
Saturday	-	Khichuri	-
Sunday	-	Egg Curry	-
Monday	-	Fish Curry	-
Tuesday	-	Chicken Curry	-
Wednesday	-	Beef Curry	-
Thursday	-	Mixed Vegetable	-
Friday	-	Special Menu	-

36.3 Menu Planner Features

Super Admin / Manager পারবেন:

- Create Weekly Menu
- Create Monthly Menu
- Change Any Day Menu
- Duplicate Previous Week Menu
- Set Holiday Menu
- Set Special Event Menu
- Set Festival Menu
- Set Complimentary Menu
- Enable/Disable Any Menu

36.4 Fixed Meal Policy

যেসব Employee-এর Meal Type = **Fixed Company Meal**, তারা শুধুমাত্র ওই দিনের নির্ধারিত খাবারই অর্ডার করতে পারবে।

Business Rules:

- দিনে সর্বোচ্চ ১টি Meal।

- Fixed Meal পরিবর্তন করা যাবে না।
- অতিরিক্ত খাবার নিতে চাইলে Manager Approval প্রয়োজন (যদি নীতি অনুযায়ী অনুমোদিত হয়)।
- একই দিনে দ্বিতীয়বার অর্ডার করলে সিস্টেম তা প্রত্যাখ্যান করবে।

37. Meal Pre-Booking Module (Enhanced)

Client আগামী দিনের অথবা নির্ধারিত দিনের খাবার আগেই বুক করতে পারবে।

Booking Rules

- আগামী ১-৭ দিনের Meal Pre-book করা যাবে (System Settings অনুযায়ী সীমা নির্ধারণযোগ্য)।
- Cut-off Time (যেমন রাত ১০:০০) এর পরে পরবর্তী দিনের বুকিং বন্ধ হয়ে যাবে।
- Cut-off-এর আগে Client বুকিং Edit বা Cancel করতে পারবে।
- Cut-off-এর পরে শুধুমাত্র Manager Edit করতে পারবেন।

Booking Status

- Pending
- Confirmed
- Modified
- Cancelled
- Expired

Booking Dashboard

Client দেখতে পারবে:

- Tomorrow Meal
- Upcoming Meals
- Booking Status
- Booking Date
- Collection Type (Dine-in / Take Away)

38. Kitchen Demand Forecast

Meal Planner + Pre-booking-এর তথ্য ব্যবহার করে সিস্টেম Kitchen-এর জন্য স্বয়ংক্রিয় Demand Forecast তৈরি করবে।

Example

Tomorrow Meal Summary

Food	Total Quantity
Fish	145
Chicken	82
Egg	37
Rice	264
Dal	264

Estimated Raw Materials

Item	Estimated Need
Rice	52 kg
Fish	38 kg
Chicken	26 kg
Egg	40 pcs
Oil	9 L

Note: Raw Material Estimation Formula System Settings থেকে কনফিগার করা যাবে।

39. Purchase & Inventory Planning

Kitchen Demand Forecast-এর ভিত্তিতে Manager বাজারের পরিকল্পনা করতে পারবেন।

Purchase Request

- Request Number
- Date
- Requested By
- Supplier
- Expected Cost
- Status

Purchase Voucher

- Voucher Number
- Vendor Name
- Purchase Date
- Category
- Amount
- Payment Method

- Remarks

Expense Categories

- Rice
- Fish
- Chicken
- Beef
- Vegetable
- Cooking Oil
- Gas
- Electricity
- Cleaning
- Kitchen Equipment
- Staff Salary
- Maintenance
- Miscellaneous

40. Income & Expense Management

Income Sources

- Wallet Recharge
- Cash Sales
- Salary Deduction
- Company Billing
- Guest Payment
- Other Income

Expense Sources

- Market Purchase
- Kitchen Expense
- Staff Salary
- Utilities
- Maintenance
- Cleaning
- Miscellaneous

Financial Reports

- Daily Income
- Daily Expense
- Weekly Income
- Weekly Expense
- Monthly Profit/Loss
- Yearly Financial Summary
- Company Subsidy Report

41. Company Subsidy Management

কিছু Employee-এর Meal সম্পূর্ণ বা আংশিকভাবে কোম্পানি বহন করবে।

Subsidy Types

- 100% Complimentary
- 50% Subsidized
- Fixed Subsidy Amount
- Department-wise Subsidy

Subsidy Dashboard

- Today's Subsidy
- Weekly Subsidy
- Monthly Subsidy
- Yearly Subsidy
- Department-wise Subsidy
- Employee-wise Subsidy

42. Real-Time Order Pipeline

Client Dashboard-এ প্রতিটি অর্ডারের সম্পূর্ণ Progress Timeline দেখা যাবে।

```
